Sheer Curtains

Custom made sheer curtains are a must to soften the look of any window where you have blinds, or to give you privacy when your blackout curtains are open or simply on their own when you just want to soften your room.

Sheer curtains are very fashionable and affordable and add a delicate touch to your windows.

You can have sheer curtains on their own, over a blind, as a main curtain with a back light or coloured lining or as a back curtain with a main front filtered or blackout curtain statement.

There are so many options for your window coverings, it just depends on the look, style and design you want to achieve in your home.

Blockout Curtains

Lined curtains have more body and are perfect for bedrooms or commercial guest rooms and media rooms adding a professional look while offering privacy in addition to helping with reducing sound, heat and cold. The backings are of a blockout poly and are also available in a silicone finish, ideal for our harsh weather conditions.

You will find that the possibilities are endless with the types of fabrics available to create the perfect finish on your windows. Experiment with samples of different textures, colours, and weight to find the right combination for your needs.

Roller Blinds

Roller Blinds are a versatile option providing you with a stylish and space saving window treatment that can be customised to suit any space or room.

Sun filtering blinds are well suited to areas which require a degree of privacy and light control, such as the living room or kitchen. If you prefer full outside view, sunscreen blinds are a popular option which provides you with day time privacy and UV protection.

For bedrooms and more secluded spaces, blackout blinds as a plain or textured fabric finish offers a great solution with a wide range of patterns to match the décor and style of each individual room. You can also choose a day/night blind if you require both blackout and daytime sun protection and privacy.

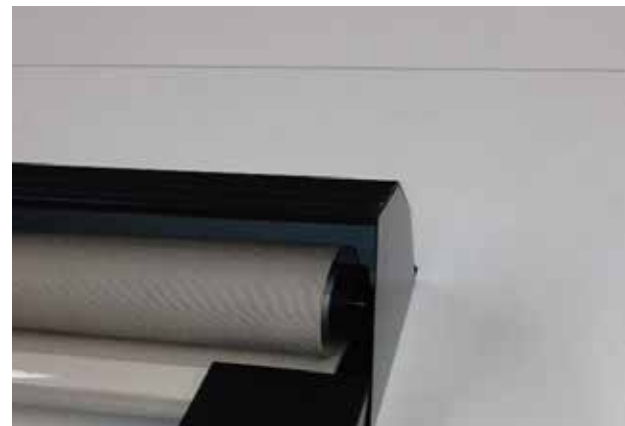

Automation

Automate your curtains and blinds with options of powered, battery or solar. Use your hub to set scenes and timers, convenient when you go away. Use Siri, Alexa or Google to control your window coverings with your tablet, smartwatch or even the tv.

Options of 5 or 15 channel remote control in gloss white or matt black, with group channeling options.

2 storey houses, no problem. Simply purchase a usb responder.

Awnings

Our Awnings are made from canvas and Sheer view, offering UV protection and available in a great range of colours.

Automatic Awnings with projection from the window from 100mm up to 900mm.

Straight drop Awnings with or without lock downs.

Drop down Awnings wire guide with stainless steel cable guides.

Channel Awnings The awning is set between 2 side channels to offer optimum coverage, especially ideal for larger openings.

Folding arm Awnings are a functional shade solution for large outdoor areas.

Awnings can be with or without matching hooding and come manual or the motorised options.
